MEMORANDUM FOR: EIC Subcommittee on Transportation

SUBJECT : Review of Air Force Proposed External Research Project,
 "Development of Space, Time, and Movement Factors for
 Economic-Military Model"

1. Attached is a description of an external research project for which Air (Targets) is proposing to contract. Being primarily concerned with transportation, it falls within the area of responsibility of your subcommittee, but the methodologies proposed (involving alternative models for electronic-computer solution) involve techniques with which members of the Subcommittee on General Economic Analysis are especially familiar. It is, therefore, requested that your subcommittee review this proposal in accordance with DCID 15/1 -- in consultation as appropriate with the Subcommittee on General Economic Analysis.

2. A listing of related projects recently completed or presently underway within the US Government (both internal and external) is being sent to you separately but should be in your hands no later than Monday morning, 5 November. It is requested that your subcommittee recommendations, taking consideration of any suggestions by the Subcommittee on General Economic Analysis, be transmitted to the EIC Secretariat prior to c.o.b. 9 November to facilitate a prompt EIC reply to the Air Force submission.
